The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. Continuation of 11. does NOT place the application in condition for allowance because: The drawings remain objected to as in the final office action and the specification stands rejected under 35 USC 132(a) for containing new matter since the specification originally stated that the rotational axle was parallel to the groove but now states that it is perpendicular. The claims also stand rejected under 35 USC 112 1st paragraph as stated in the final office action. In response to this rejection the Applicant again discusses how the device works and references the schematic shown in Figure 1. However the schematic does not enable one of ordinary skill to make and/or use the device as intended. The schematic does not provide any sort of structural relation between the parts and the specification does not disclose these details. How are the rocker elements attached on individual rotatable axles and where are these axles in relation to the rest of the device? How are the springs attached to the rocker elements? Claims 9-14 stand rejected as in the final office action and the Applicant's remarks only address claims 5-8 which are now canceled.
